-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Claims 7-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/7/06.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Heidecke.

Heidecke discloses using a sensor to detect bicycle speed and direction (col. 9, line 60 – col. 10, line 13), generating electricity through pedal by driving the generator with convertible interior magnetic field (col. 6, lines 1-8), displaying the scene according to current location by the computer installed with virtual scene database (col. 9, line 60 – col. 10, line 13), changing the current location and corresponding scenes by the setup the detected speed and direction (col. 9, line 60 – col. 10, line 13), and auto adjusting interior magnetic field of the said generator according to the changing scenes, thus to alter the cycling resistance produced hereby (col. 6, lines 1-8).

As for claims 2, 6, Heidecke further discloses the scene database include many corresponding data of different cycling game, resistance parameter correspondent with the afore said scenes, wherein the resistance parameter may comprise the cycle-way gradient value of the current scene (col. 9, line 60 – col. 10, line 13)., using the speed detecting method to calculate current speed of the simulated bicycle (col. 9, lines 1-14), sound output simulating the background sound of changing scene (col. 6, line 25).

Allowable Subject Matter

Claims 3-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Parks discloses an apparatus for removably interfacing a bicycle to a computer.

Art Unit: 3764

Melton et al disclose an exercise cycle with an interactive amusement device.

Phillips discloses an exercise bicycle adapted for controlling video games.
